

Indoor Navigation Based QR Codes

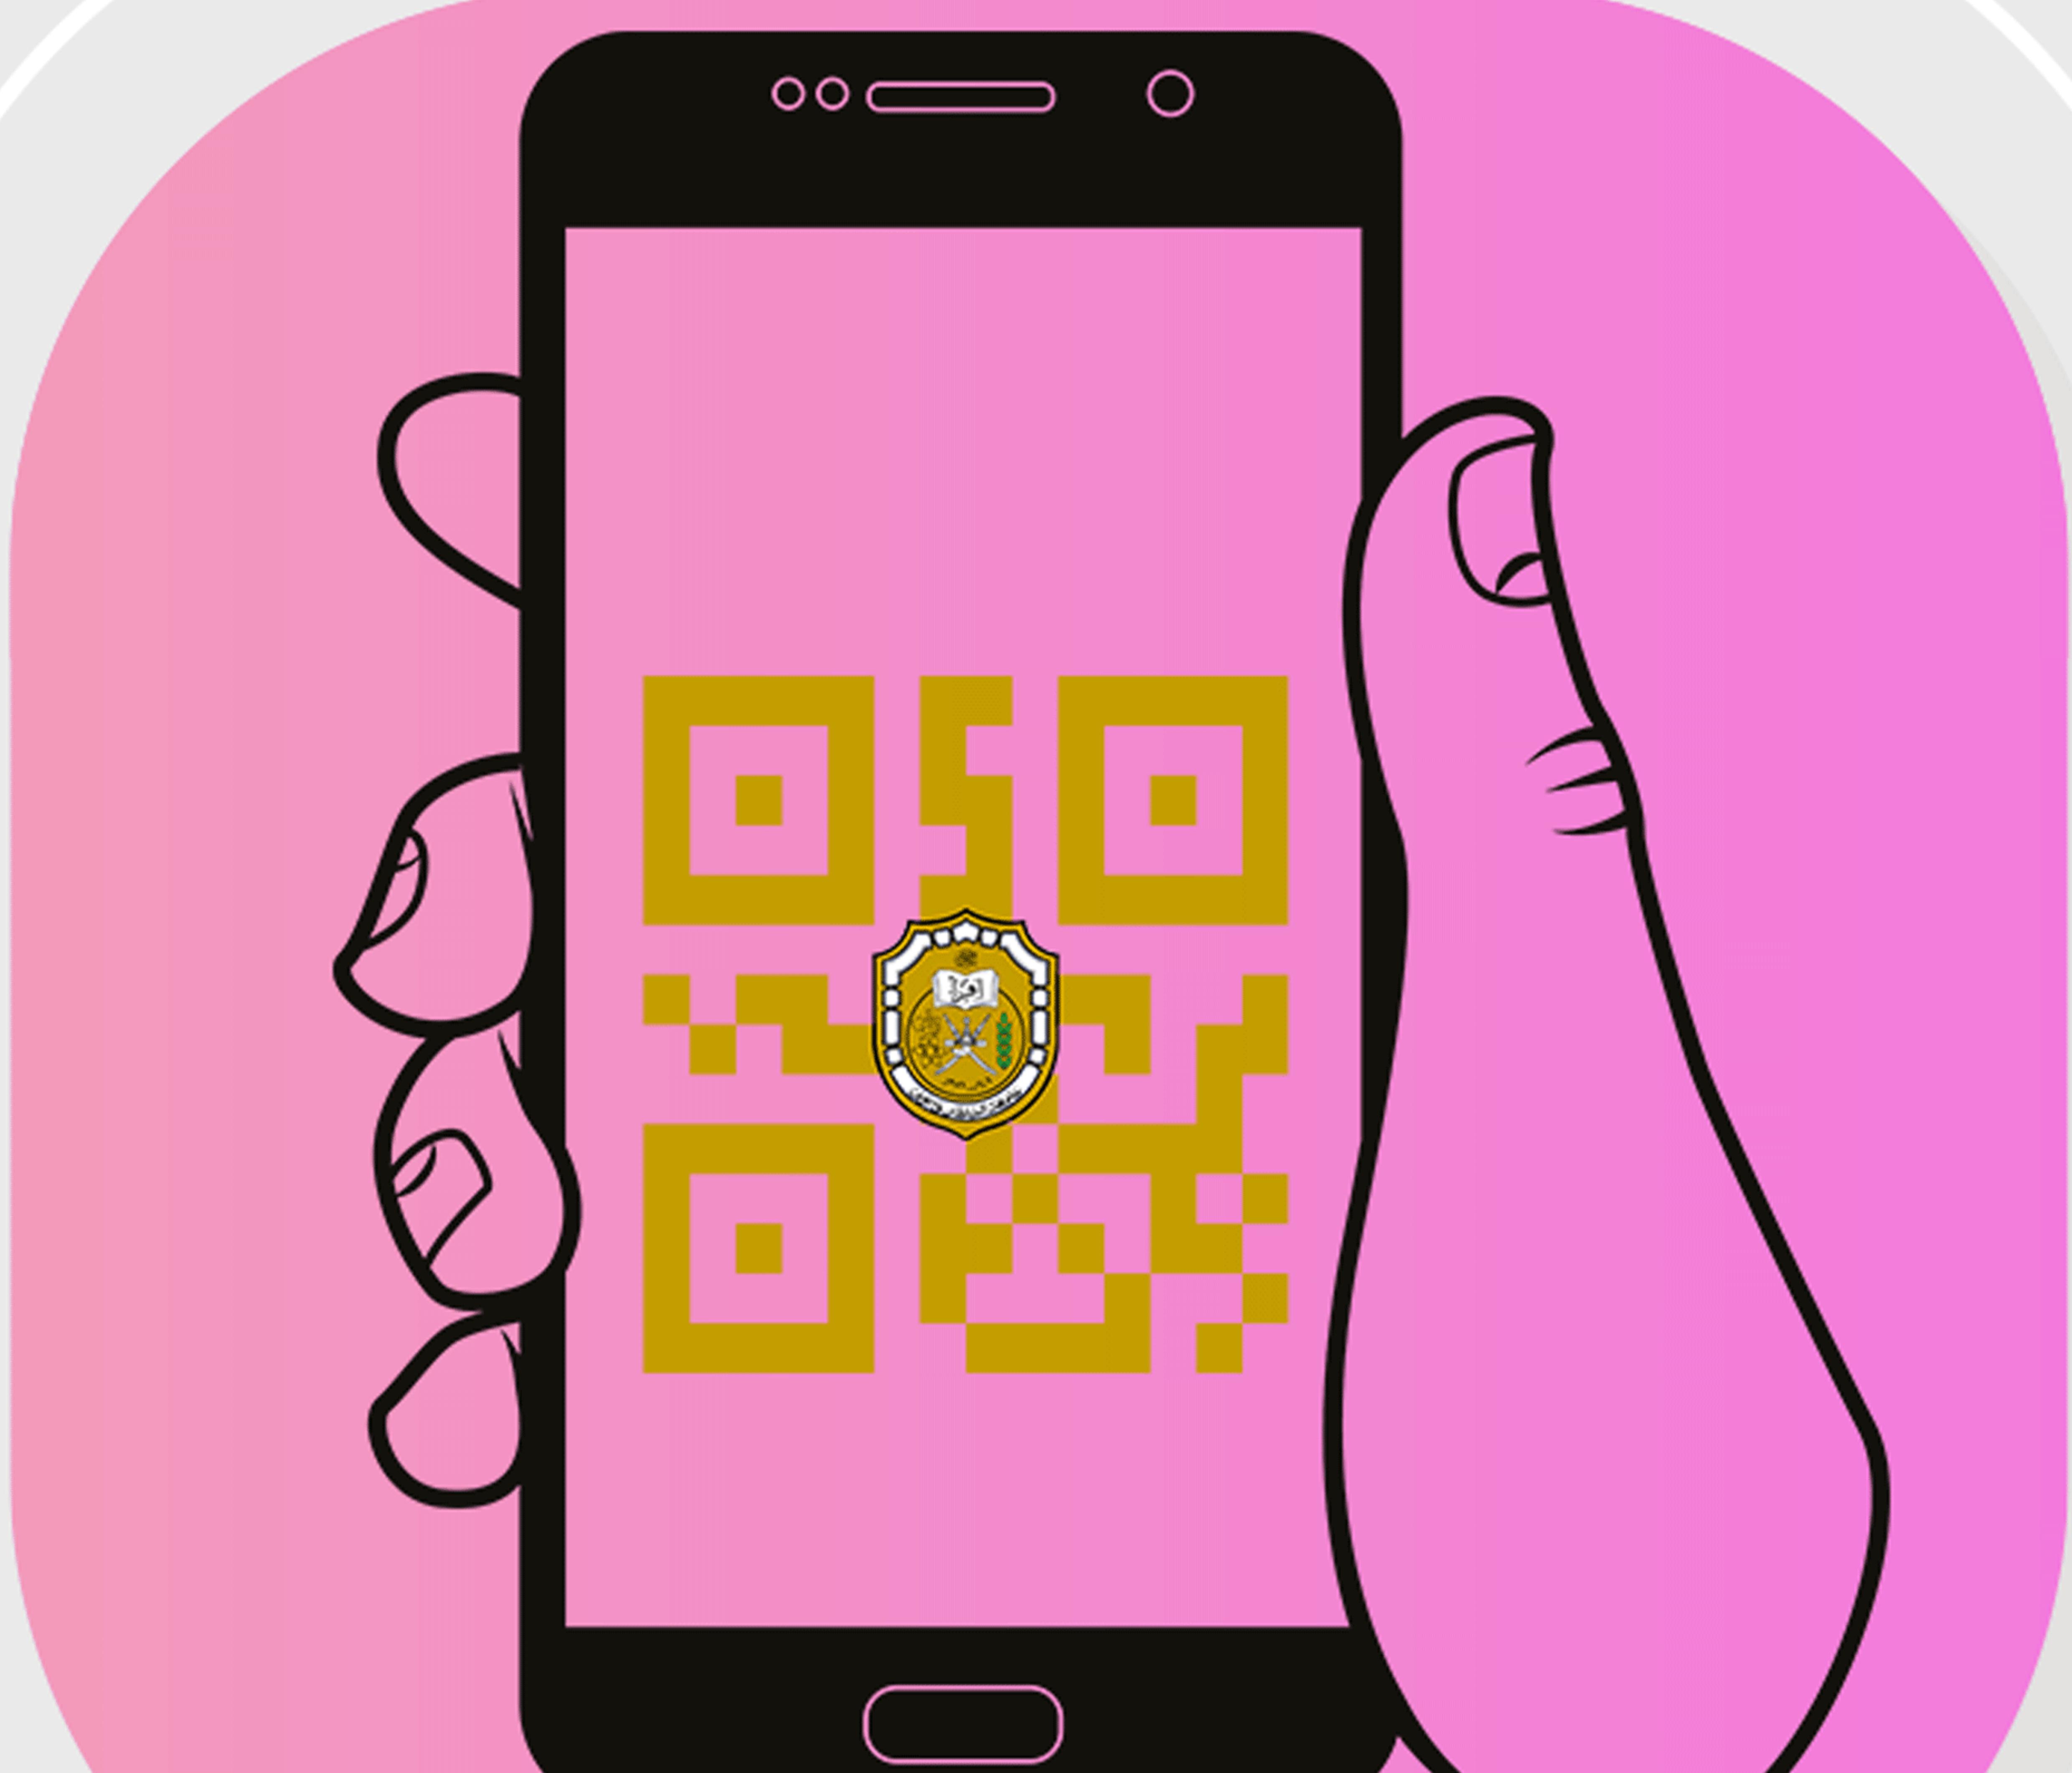

This application is used to allow the user to be able to reach his selected location where the user scans the nearest QR-Code and the application will generate the shortest path to the location. The following is the method on how to use the application.

STEP 1

Scan the nearest QR code
to configure your location.

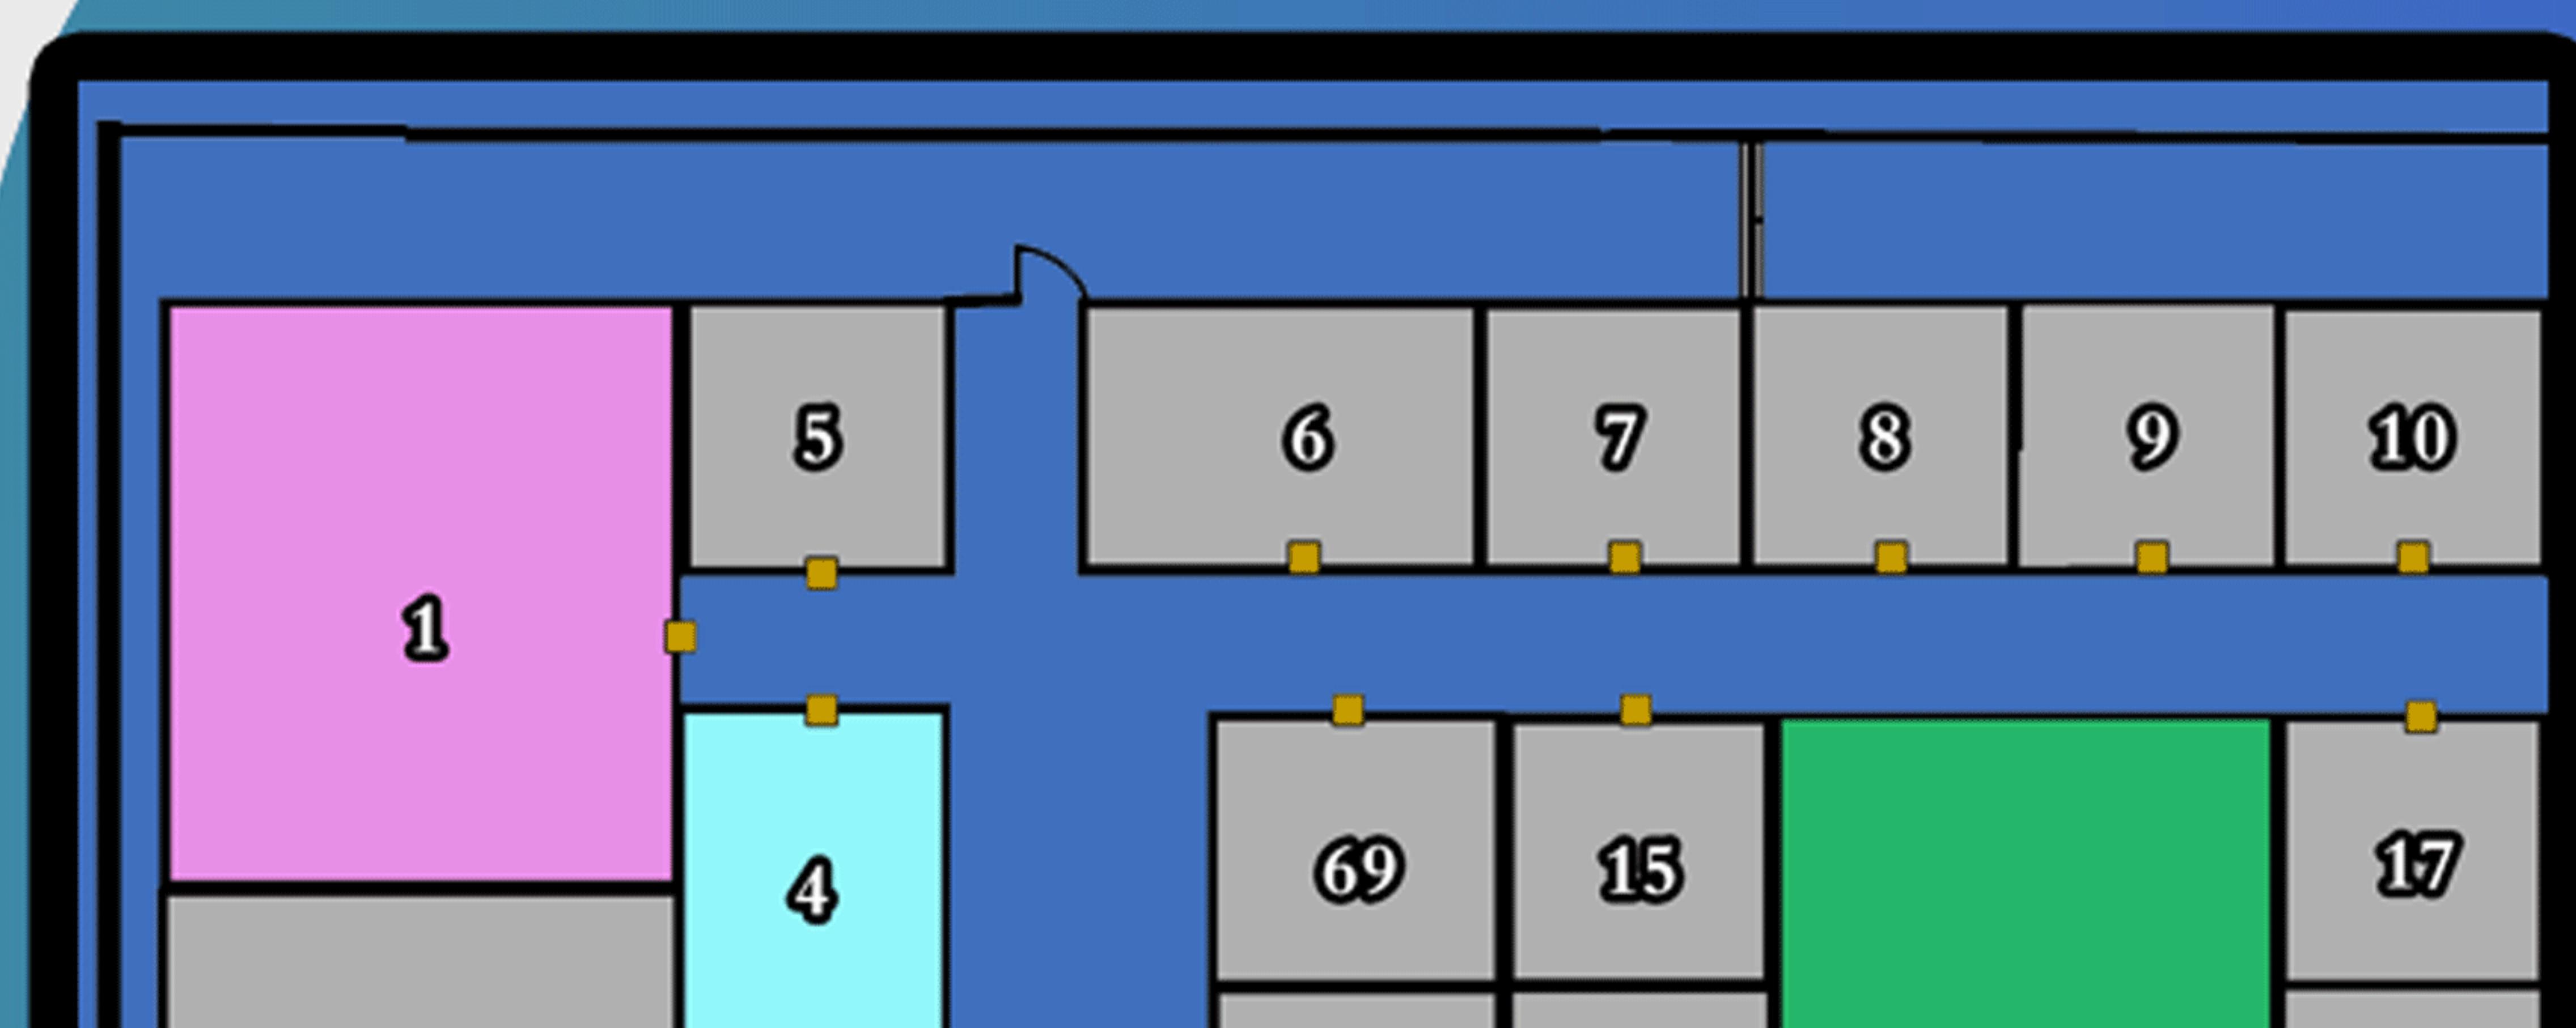

Note: QR codes are located
near the offices and hallways.

STEP 2

Locate yourself on the Map.

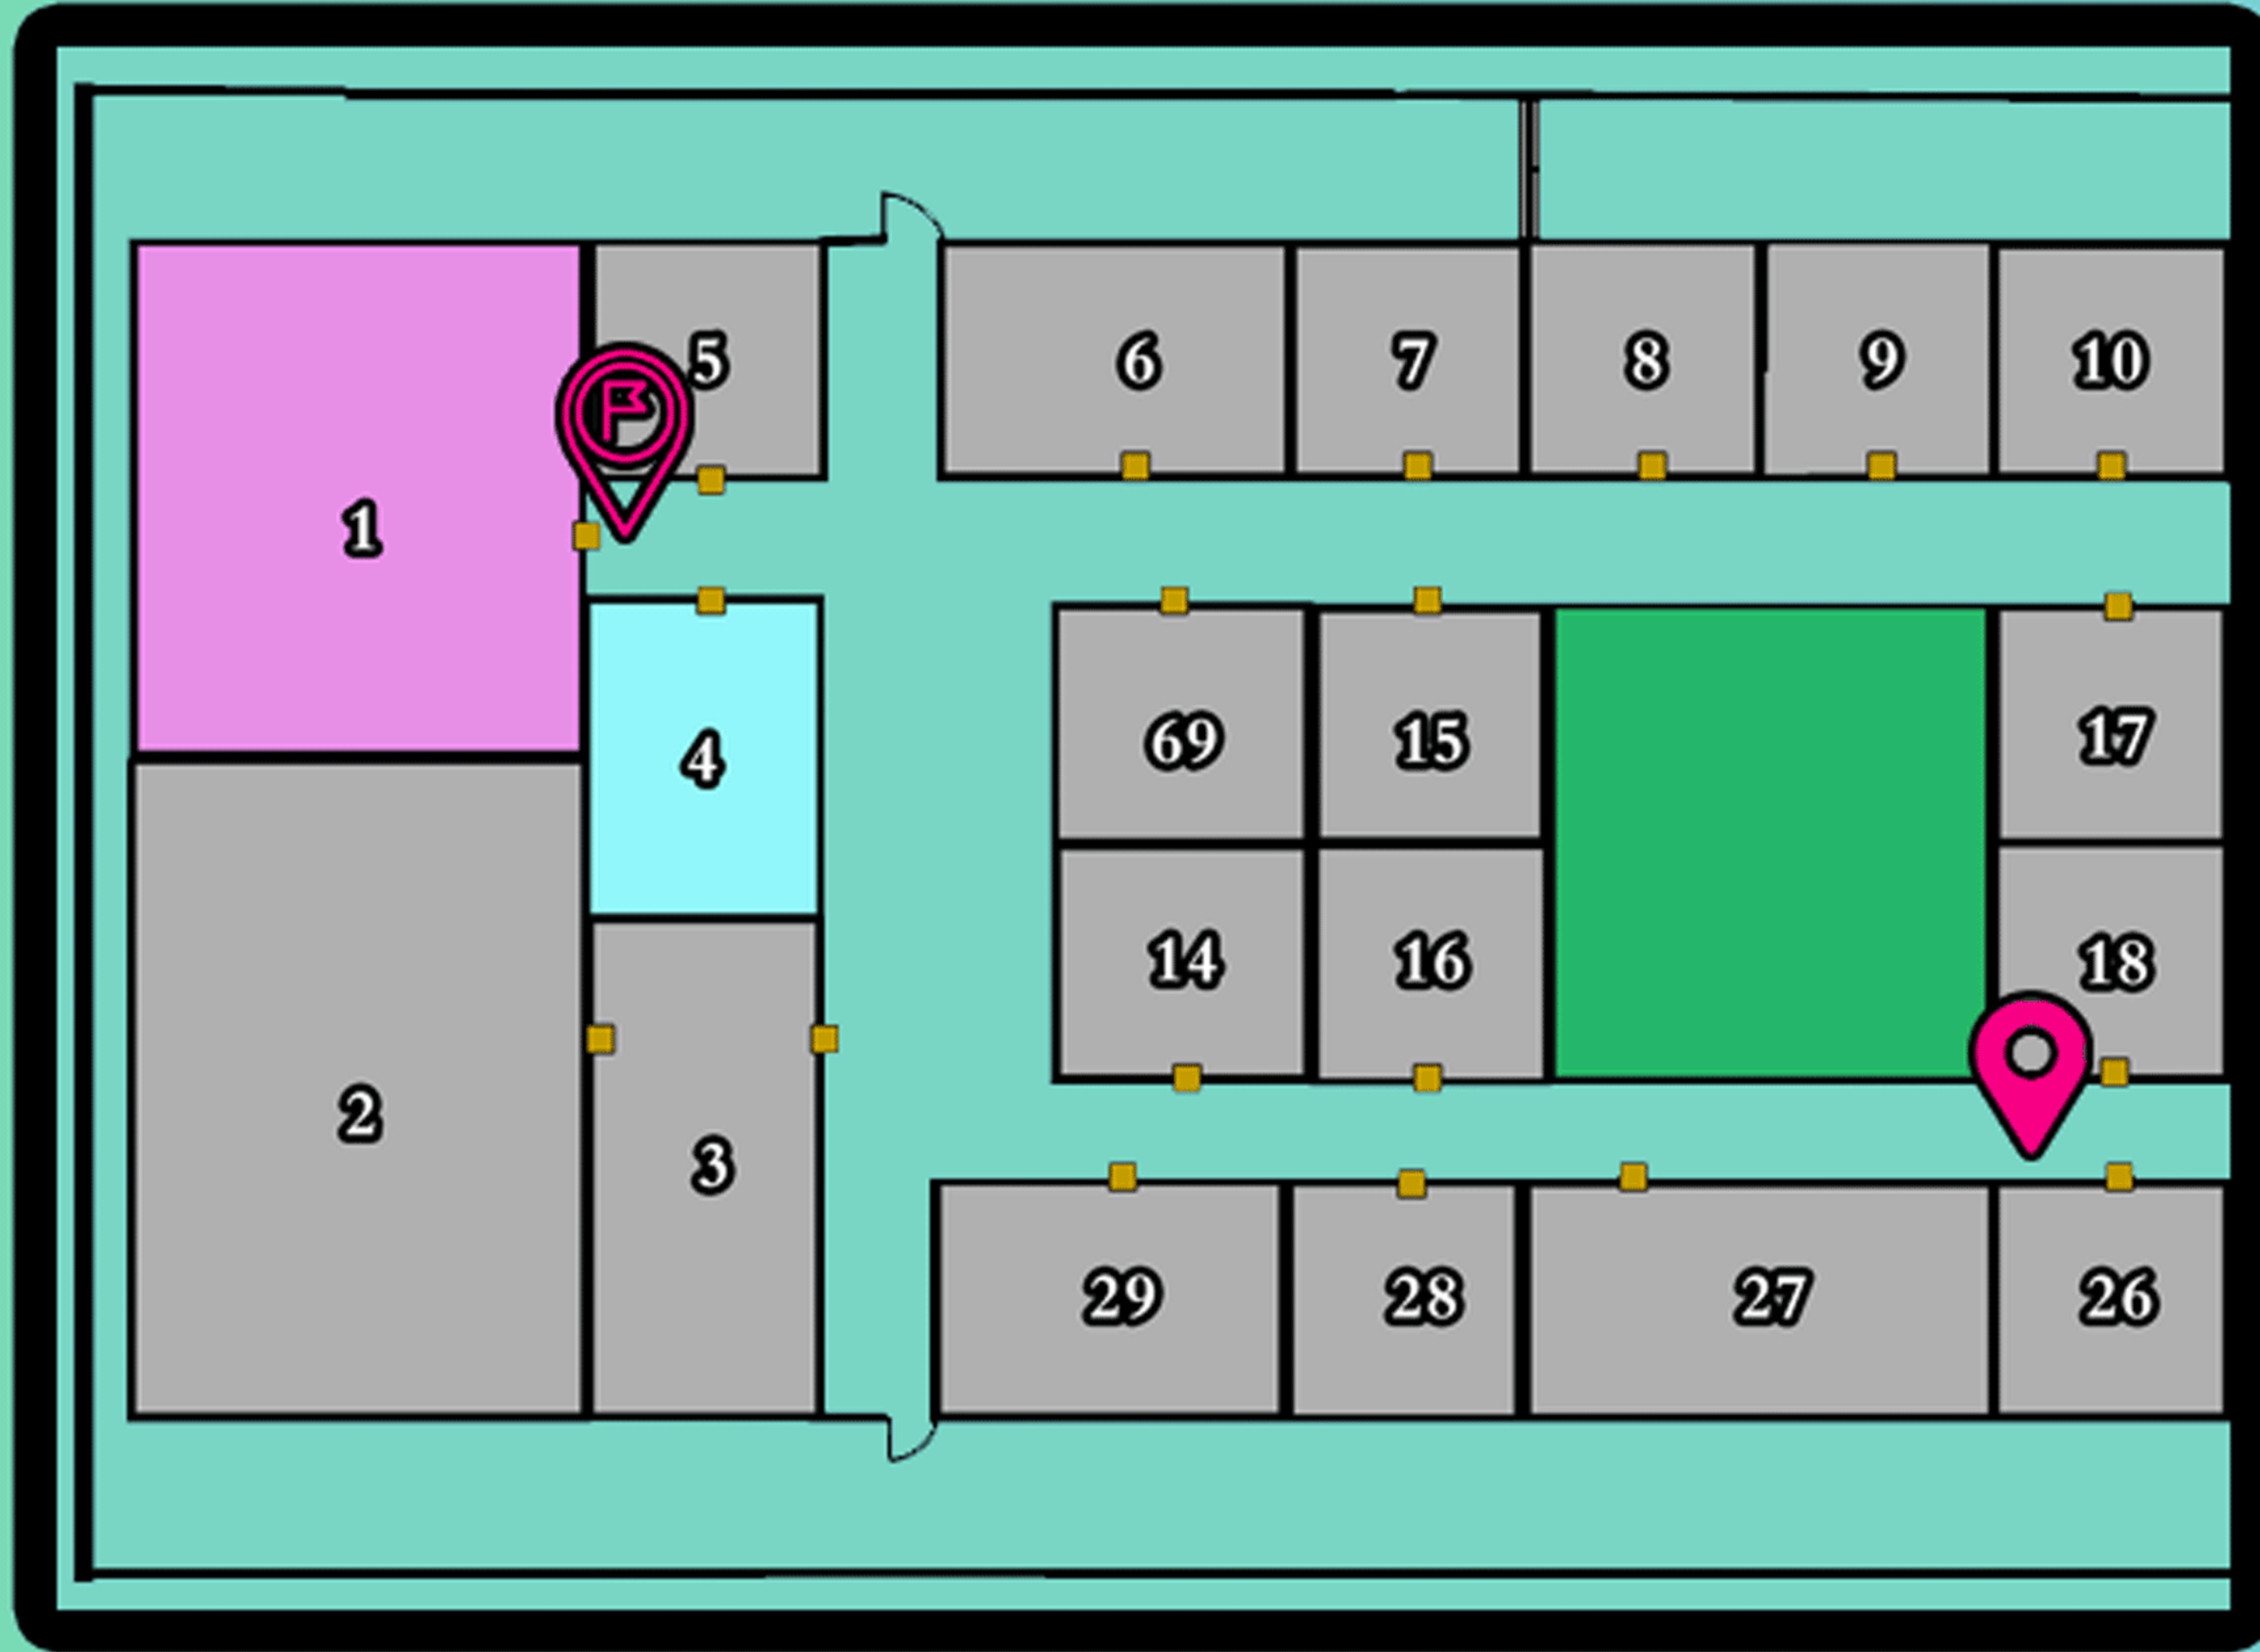

STEP 3

Search for the desired location(Office/Room).

Note: E.g. Dean's Office

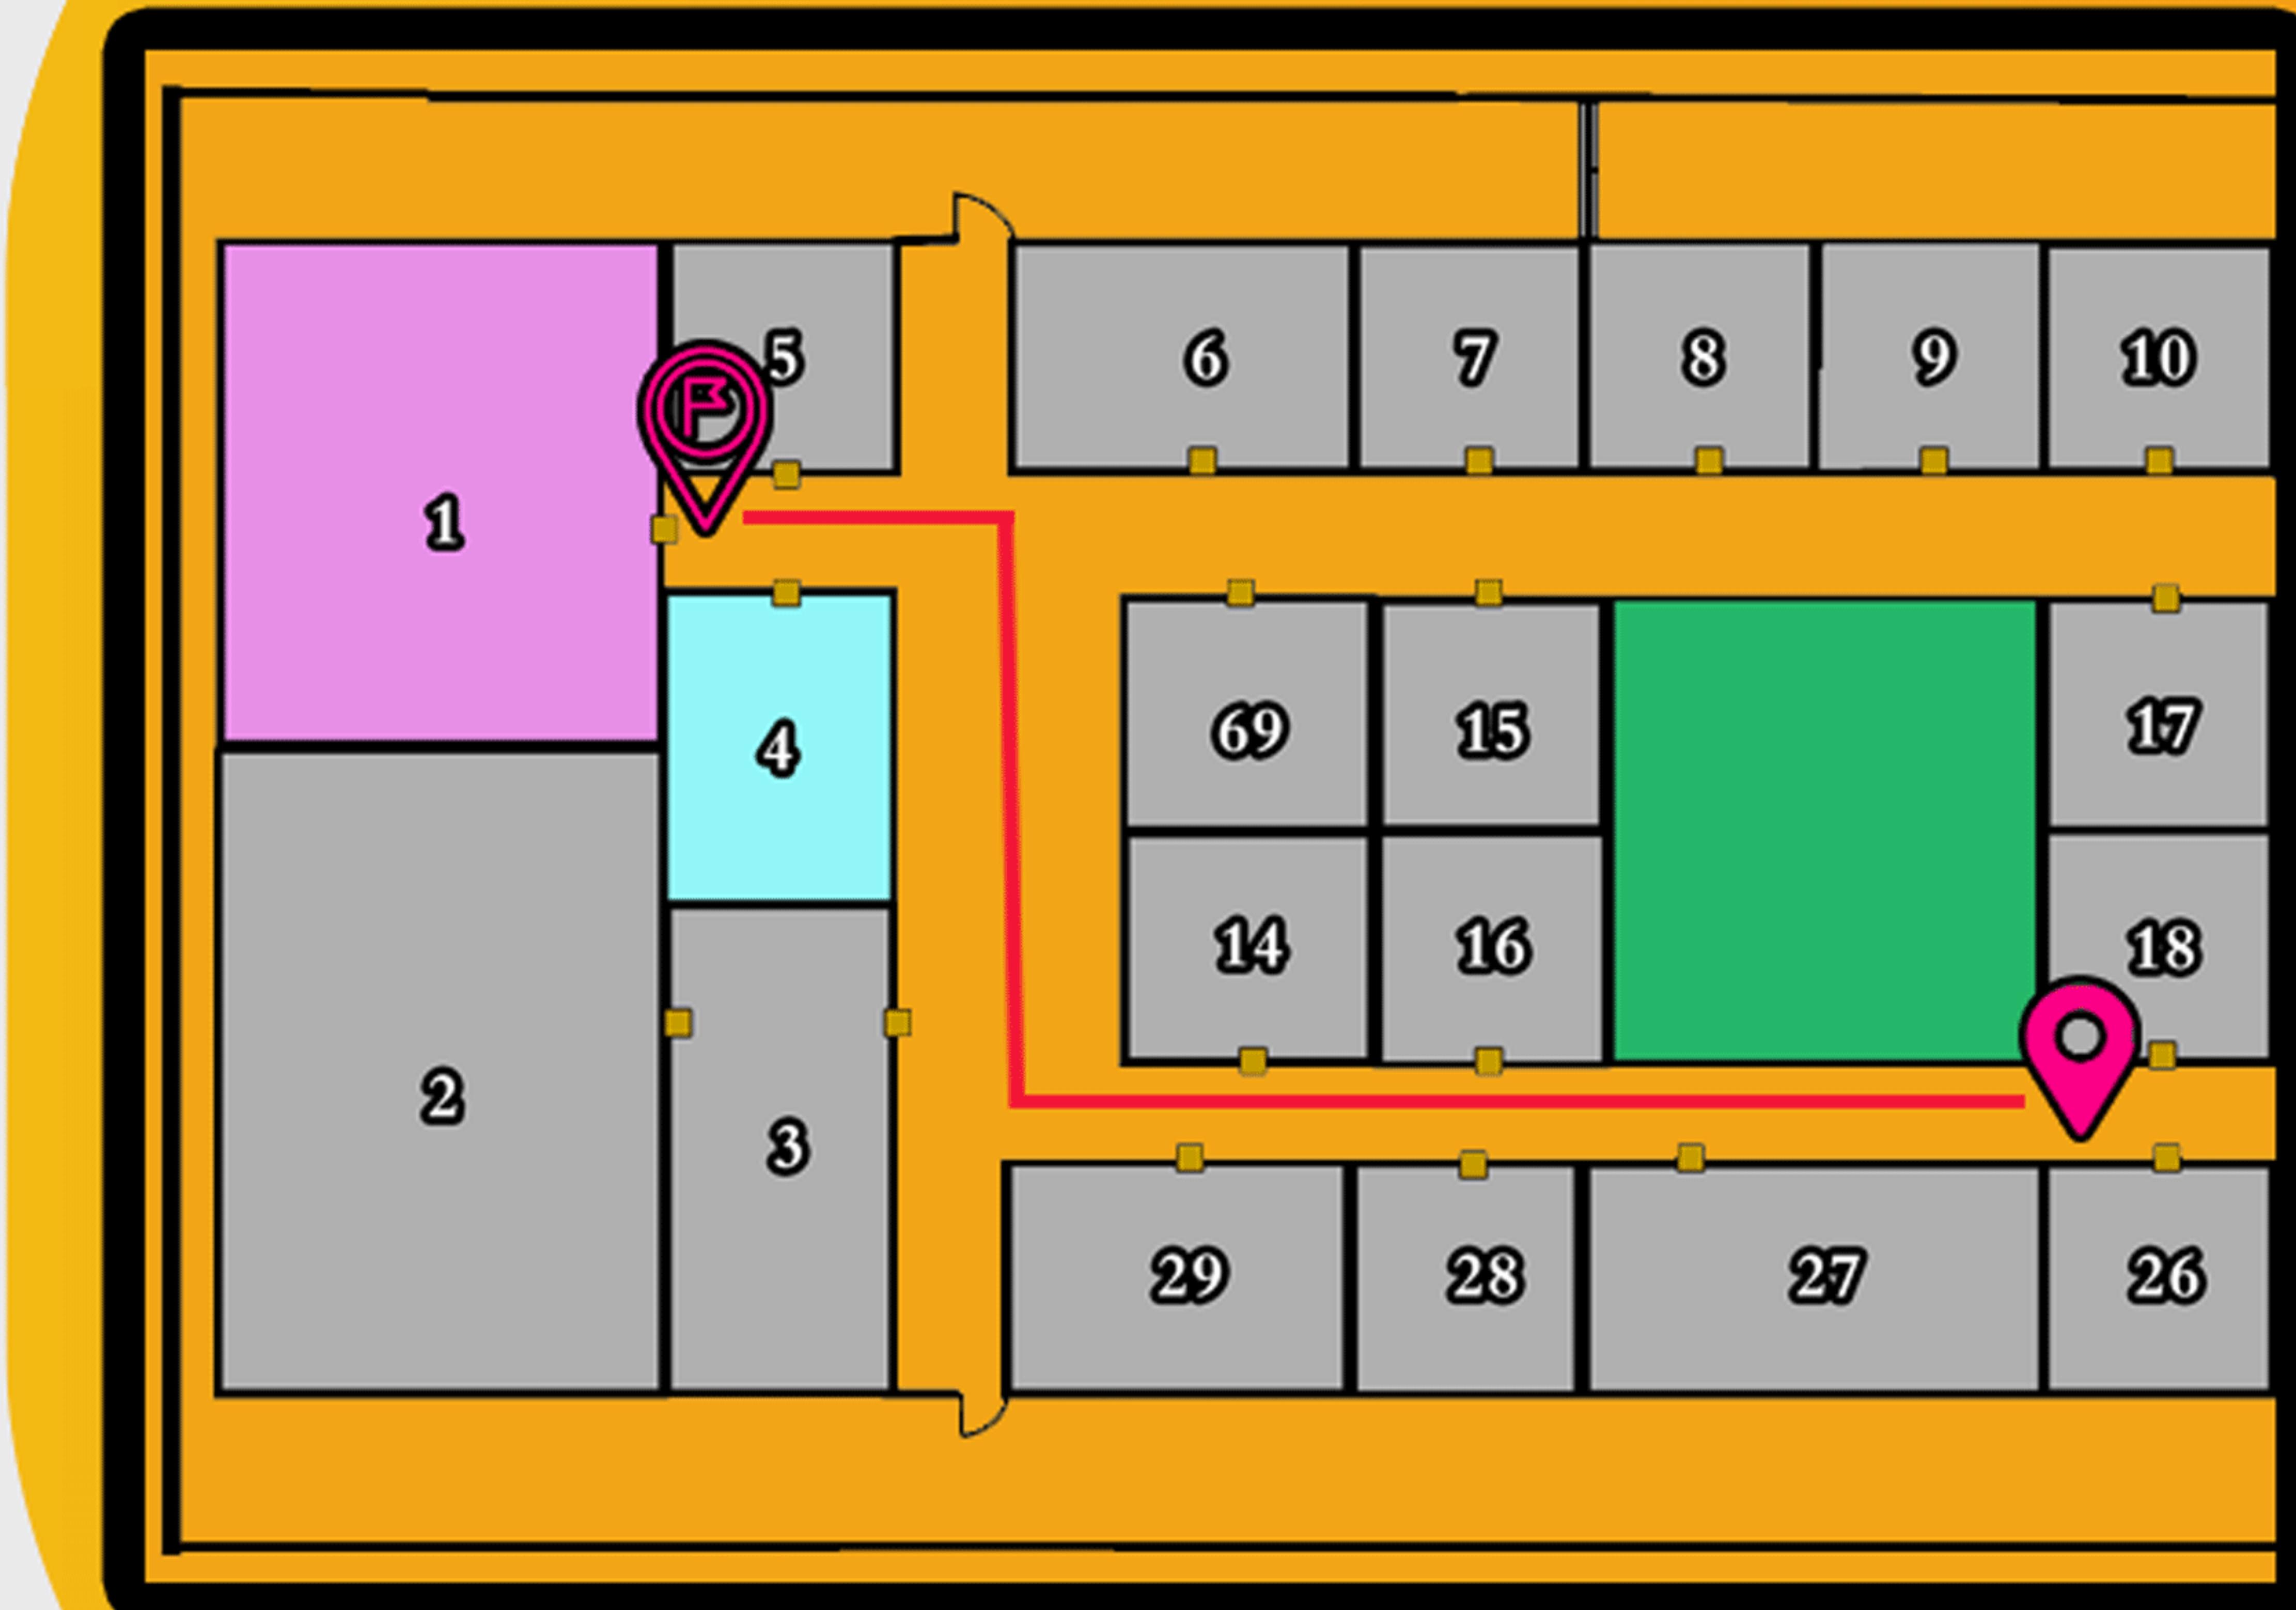

NOTE: E.g.: Deans Office

STEP 4

The shortest path to your desired location is presented.

Note: Scan the QR codes in your path to update your location

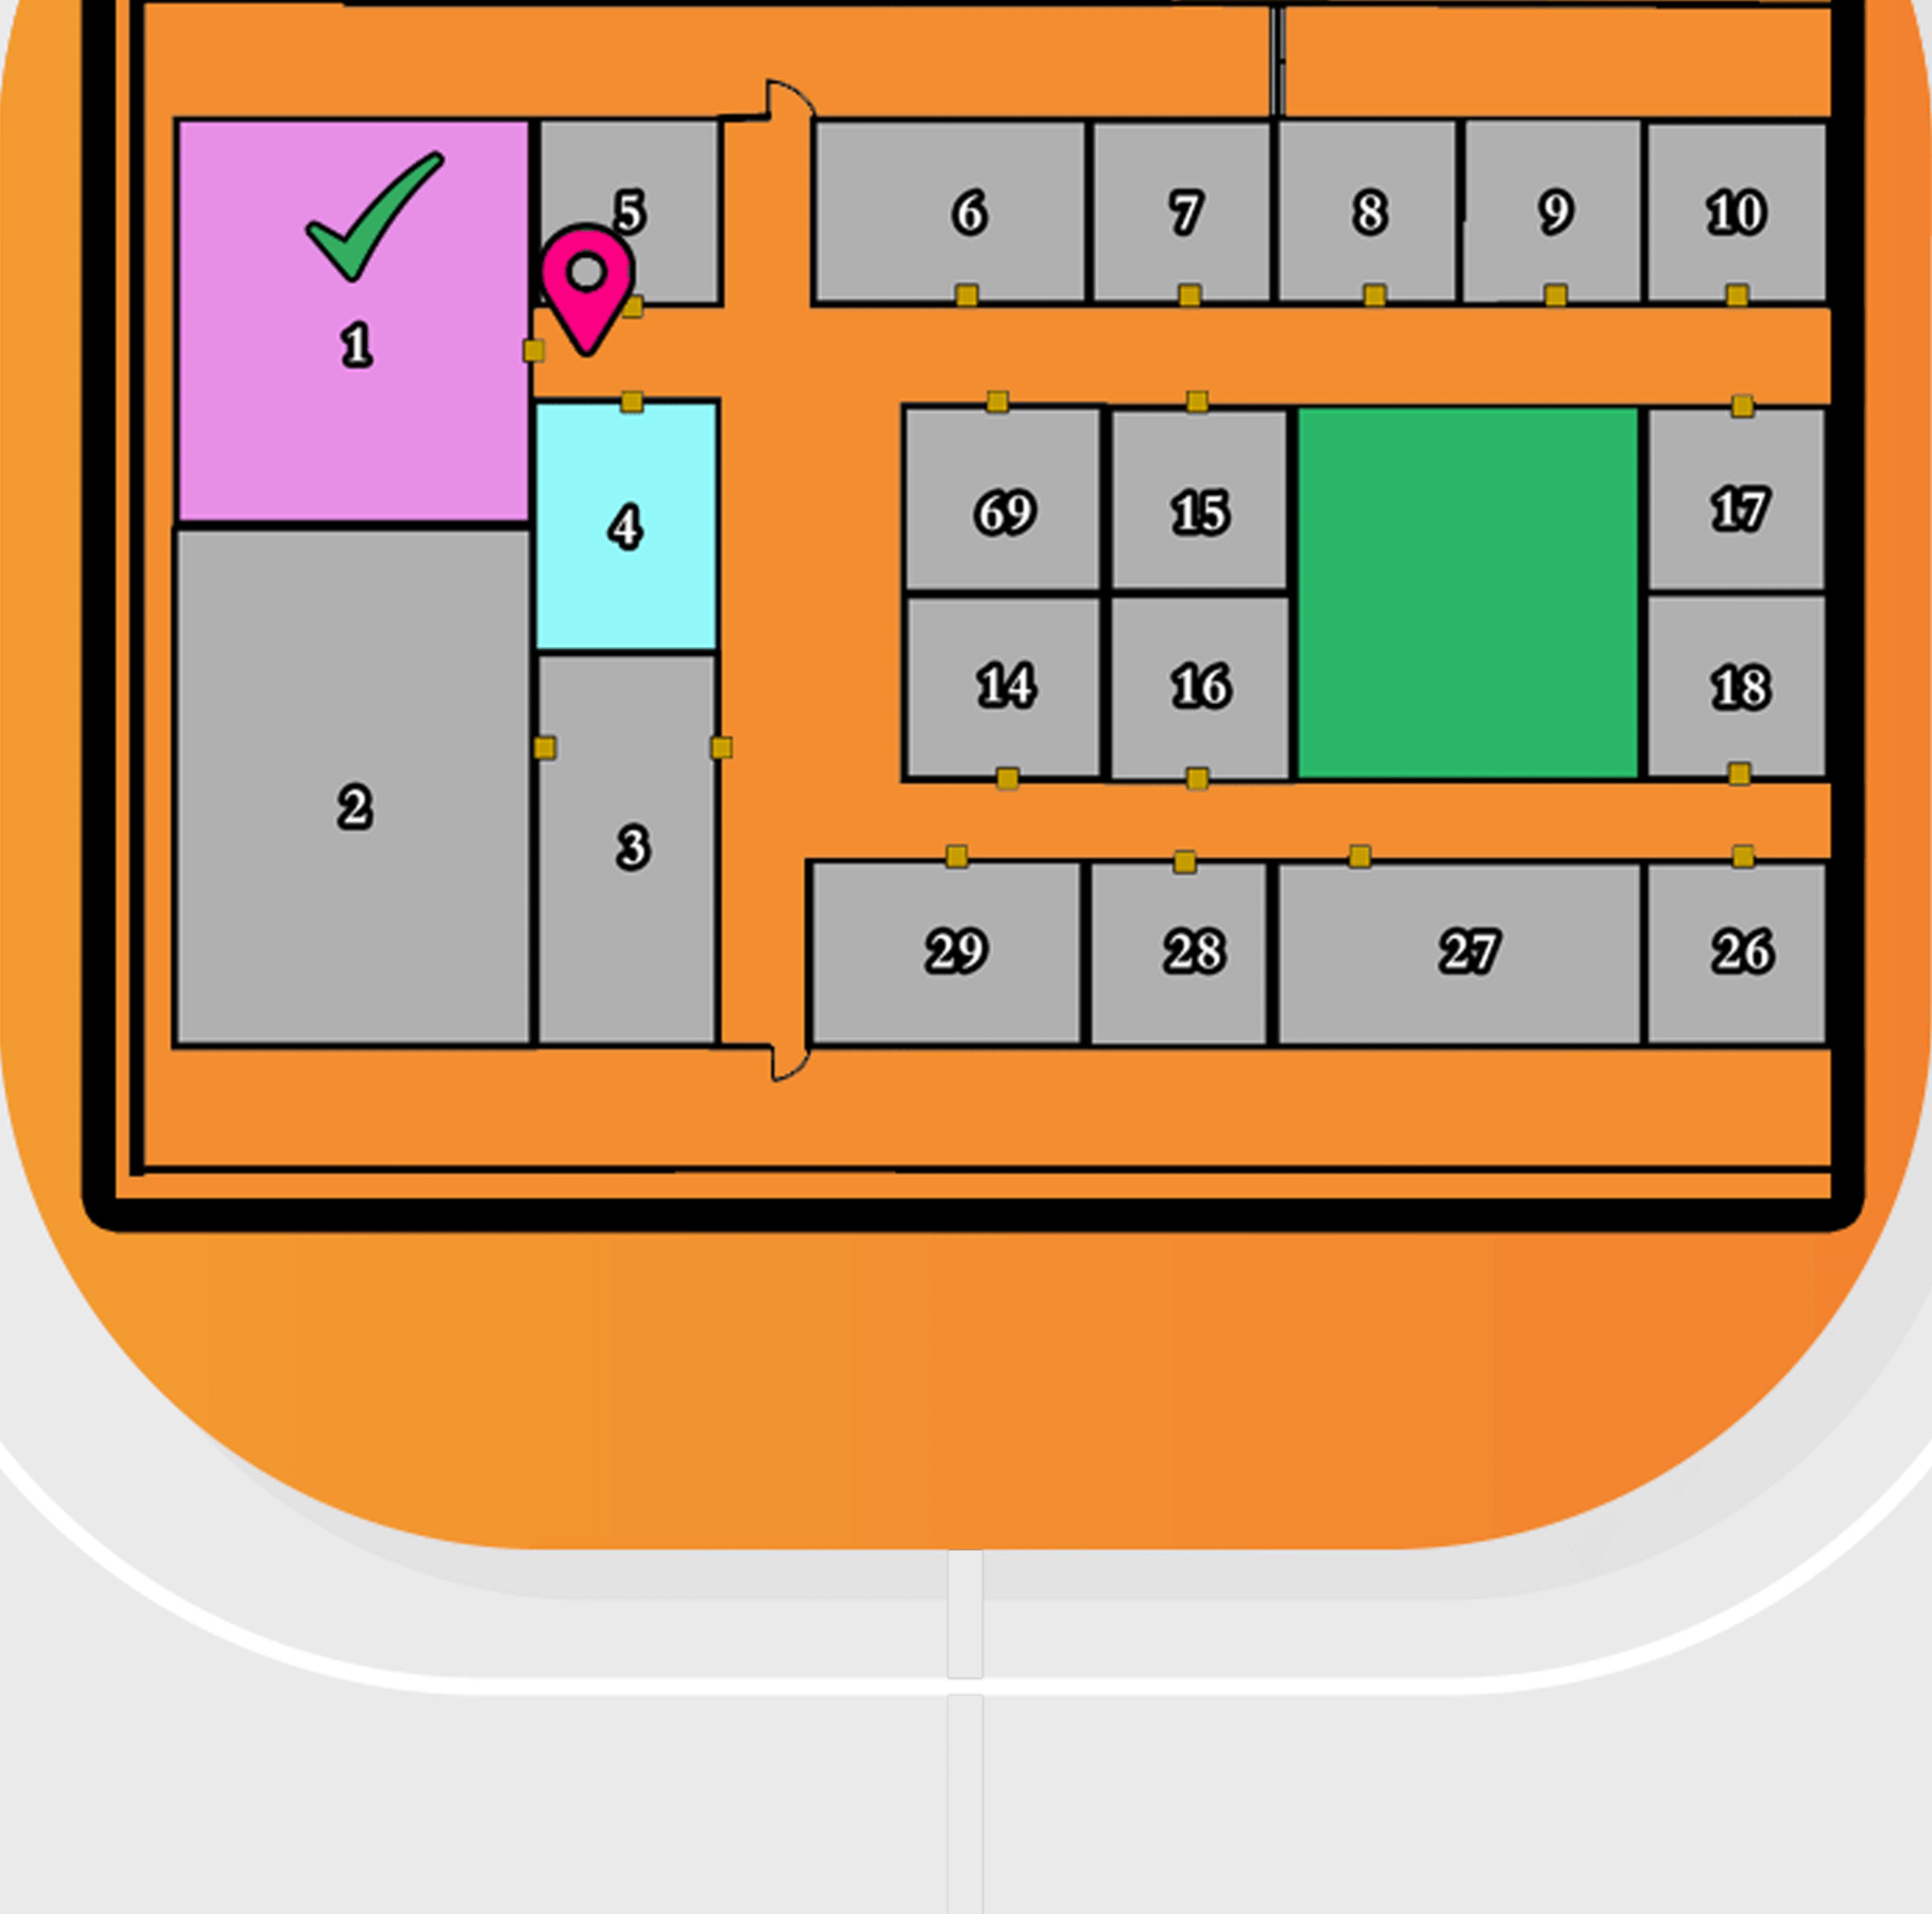

STEP 5

Scan the QR code to check for the destination arrival.

Note: Repeat Step 1.
